

# #ScienceWeek With Mrs Swain

To celebrate National Science Week 2020, the students had a great time following a sequence of instructions to build motorised Lego creations. They coded the instructions from the iPad to make their builds change colour, spin faster or spin slower.

The children also got to play with Blue Bots and develop a set of instructions to drive them from A to B, using the iPads and avoiding a few obstacles on the way.

Here are just a few photos of the students enjoying National Science Week 2020 with the Blue Bots and Lego.
